

BOTOX INFORMED CONSENT

BOTULINUM TOXIN - A

Botox, or Botulinum toxin, is a neurotoxic protein produced by the bacterium *Clostridium botulinum*. In medical aesthetics, Botox is commonly used to temporarily reduce the appearance of facial wrinkles by inhibiting muscle movement. By injecting small doses of Botox into specific muscles, it can relax them, leading to a smoother and younger-looking appearance. It is important to understand the benefits, risks, and alternatives associated with Botox treatment before proceeding.

CLIENT ACKNOWLEDGEMENTS

By signing below, I acknowledge that:

I understand that Botox treatment involves the injection of Botulinum toxin into targeted facial muscles to reduce the appearance of wrinkles and fine lines.

I have been informed that the effects of Botox are temporary and typically last for several months, after which repeat treatments may be necessary to maintain results.

I understand that while Botox injections are generally safe when performed by a qualified healthcare professional, there are potential risks and side effects, including but not limited to bruising, swelling, pain at the injection site, headache, flu-like symptoms, and temporary weakness or drooping of nearby muscles.

I acknowledge that individual results may vary, and there is no guarantee of specific outcomes or longevity of results with Botox treatment.

I have been informed about alternative treatments and understand that Botox may not be suitable for all concerns or desired outcomes.

I understand that it is important to disclose any medical conditions, allergies, medications, or previous cosmetic procedures to my healthcare provider before undergoing Botox treatment.

I acknowledge that I have had the opportunity to ask questions and have received satisfactory answers regarding the Botox procedure, including its risks, benefits, and alternatives.

I consent to undergo Botox treatment and agree to follow all pre- and post-treatment instructions provided by my healthcare provider.
